BORIS! AMERICANS ARE INVADING US AGAIN!

SEND BACK UP!

<h2>Boris Sent The Programming Club -Official- Mini Website?</h2>

- Oh? Is that a new Pokemon? What's that?
- This → <https://github.com/Lahmacunaator/programmingclub>

■ C	Finalized the HTML examples and the site structure	3 days ago
■ Css	Update style.css	4 days ago
■ HTMLExamples	added an HTML game	a day ago
■ Images	Initial commit	7 days ago
■ JavaScript	Initial commit	7 days ago

■ .gitattributes	Initial commit	7 days ago
■ README.md	Update README.md	4 days ago
■ index.html	Html examples + main website changes	3 days ago

README.md

Programming Club

EUAS Game Design and Development Class of 2018's Programming Club Activity

How To Get Updates On The Site and View The Source Files:

1. Fork this repository. (Fork button in the top-right corner of the repository page)
2. Clone your fork repository to your computer. (use Github Desktop. File -> Clone)
3. Open index.html in your browser.
4. You can view the website and the files there.
5. You can change the files or add more files on your local repository folder and commit them. (Use Github Desktop, commit button on bottom left)
6. Push commits back to Github repository to have your own Github repository with your own files. (Use Github Desktop, Push button in top-right corner)
7. Update your fork with latest changes from this repository by merging upstream branch (Use Github Desktop. Branch -> Merge into current branch -> upstream/master -> Merge -> Push)

You! Yes, you! You Don't Want to Use GitHub?

- The new airdrop contains this → <http://188.166.113.53/>
- Maybe you should try it!
- But still download the files from GitHub otherwise you can't have the examples! 😊

NOW LET'S DECIPHER THOSE SECRET AMERICAN CODES

- Open the files you have downloaded from GitHub
